

Conversation Starters

STEM (Science, Technology, Engineering, and Math) is all around us.
Bring it to your dinner table discussions with these conversation starters!

Which do you think we'll have first: flying cars or jet packs?

What's your favorite movie with STEM? How many STEM movies can you think of?

Would you rather go for a walk in the woods or along the shore of the ocean?

What is the most important invention we use every day?

How was STEM used to prepare the meal on this table?

How was STEM used to grow the food on this table?

What will the food of the future look like?

If you could invent a solution to help one big world problem, what would it be?

Would you rather travel to the moon or the bottom of the ocean?

If you could add one new feature to a car, what would it be?

How do you think technology (like smartphones) has changed the way people communicate?

Do you think technology makes communication better or more difficult?

If you had to make a stop-motion movie with the food on your table, what would it look like?

Who was the best inventor of all time?

What's the most interesting thing you learned about in school today?

If you could invent an app, what would it do?

Engineers design things and make them better. What things in your kitchen have been engineered?

Do you prefer reading books on a tablet or on paper?

If you could invite someone from STEM (past or present) to dinner, who would it be?

How many (peas, noodles, grains of rice) are in that bowl on the table?

What STEM did you pass on your way home today?

How is STEM a part of the sports you play?
